Title: NSPS for Pressure Sensitive Tape and Label Surface Coating Operations
(Renewal)

ICR Numbers: EPA ICR Number 0658.11, OMB Control Number 2060-0004

ICR Status: This ICR is scheduled to expire on June 30, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart RR. Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 26 hours per response. “Burden” means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously-

applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of pressure sensitive tape and label surface coating operations.

Estimated Number of Respondents: 39

Frequency of Response: Initially, occasionally, and semiannually

Estimated Total Annual Hour Burden: 3,652

Estimated Total Annual Cost: \$427,962, which includes \$350,762 in labor costs, \$7,000 in capital/startup costs, and \$70,200 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The adjustment increase in burden from the most recently approved ICR is due to an increase in the number of sources and an increase in labor rates. The increase in the number of sources subject to the standard also results in an increase in the total operation and maintenance (O&M) costs as calculated in section 6(b)(iii) since the previous ICR.

There is an adjustment decrease in the total Agency burden costs. The reason for the change in Agency burden is related to a mathematical error in the calculations, which led to double counting of Agency costs in the previous ICR.

John Moses, Director, Collection Strategies Division.
